

COLOUR PROJECT

You are to create a piece using complementary colour.

Step #1: On a piece of newsprint draw twelve boxes, three across and four down.

Step #2: Inside these boxes create a distorted shape that will touch every square on your paper.

Step #3: Choose two out of the three complementary colours and colour each square, with pencil crayons, alternatively.

Eg. One square blue and orange the other square purple and yellow.

Step #4: Once this is complete, you are to do the same on a good sheet of paper given to you. Instead of pencil crayons you will be using pastels and paints. The pastels and paints should alternate as well.

Eg. Pastel, paint, pastel. Not pastel, pastel or paint, paint.
